

## Alexander Azpiri González, a young man that Cuba needs.

**Language**  
English

Today we had the opportunity to talk with Azpiri, as all his colleagues at CDC S. A. affectionately know him. A young man who currently works as Operator B of a cutting machine in the company.

With the joviality that characterizes youth, since he is only 25 years old, he explained his work to us in detail and even told us how he has taught other young people his skills. Although he benefited from the kindness of his older colleagues when he joined the company a few years ago, today he tells us of his interest in reaching category A, that would be a great achievement for him.

He sees himself in the future here at CDC, working and moving forward because he likes his work.
