

## Refloating of vessel in floating dock carried out.

**Language**  
English

The General Director of OSDE GEMAR, Roberto Ricardo Marrero, along with industry

executives, witnessed the successful refloating of a vessel at the CDC S.A. Shipyard's Floating Dock. This complex operation featured the outstanding participation of the shipyard's workers and demonstrated the professionalism of the Cuban Pilots Company and Caribbean Navigation, as announced on the Ministry of Transport's website.

The Cuban Pilots, with their unique expertise in precision maneuvers and in-depth knowledge of our waters, guaranteed precise positioning throughout the operation. Meanwhile, the specialists from Caribbean Navigation once again demonstrated why they are leaders in maritime operations, with impeccable management of the vessel's buoyancy and stability conditions.

This highly complex maneuver not only demonstrated the shipyard's technical know-how, but also the capacity for synergy between the companies to execute operations with the highest standards of safety, precision, and efficiency.
